

City of South Gate Capital Improvement Program

Release Date: February 24, 2016

CONSTRUCTION ALERT

Firestone Boulevard Bridge Widening over the Los Angeles River Phase I

Summary:

The City of South Gate will be widening the south side of Firestone Boulevard over the Los Angeles River, between Rayo Avenue and the I-710 Freeway. The widened bridge will provide an additional eastbound lane which will provide dedicated access to the I-710 freeway's southbound on-ramp.

Construction activities are scheduled to begin on March 7, 2016, and will continue through summer 2017. To alert the residential and business community of the initiation of the Firestone Boulevard Bridge Widening Project, construction signs have been installed on February 15, 2016 to alert drivers of ongoing construction efforts.

The City will continue to issue electronic notices prior to the start of upcoming phases and/or if it is anticipated that this project will impact communities adjacent to the project locations.

What to Expect:

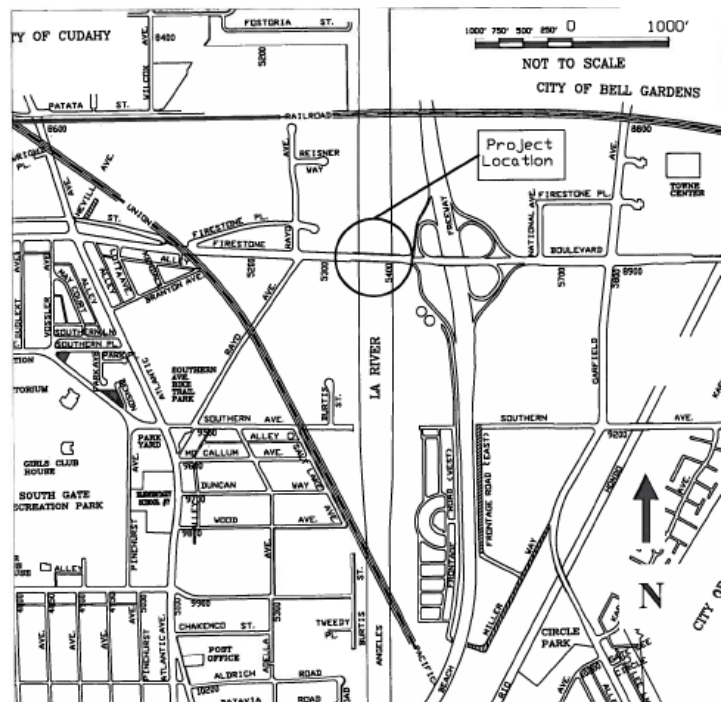

The City encourages commuters to utilize alternate routes during construction due to congested traffic in the area.
